Chapter 1:

Introduction

This chapter introduces CyberLink PowerDVD's main functions and provides a program overview. It discusses the minimum system requirements for using the program and the describes the method for upgrading to the latest version of the software.

This chapter contains the following sections:

Welcome

Welcome to the CyberLink family of home entertainment products.

The PowerDVD Program

Main Features

CyberLink PowerDVD includes the following main features:

- Supports the playback of Blu-ray Discs*

- TrueTheater™ - Surround (Virtual Speaker Mode) virtual surround technology developed by CyberLink
- TrueTheater™ - Surround (Headphone Mode) technology for headphone surround sound

    * Available in Ultra Edition (Blu-ray Disc) only.

PowerDVD Versions

System Requirements

The system requirements for CyberLink PowerDVD vary depending on the operating system installed on your machine (Windows XP or Vista). Please consult the system requirements for your version of Windows.

CyberLink PowerDVD optimizes performance by selecting the

Disc Drive

| CPU | **Intel**:
• minimum: Pentium 4 541 (3.2 GHz), Pentium D 840 (3.2 GHz), Pentium D 930 (3.0 GHz), 935 |

CPU   **Intel**:
                                    •   minimum: Pentium 4 541 (3.2 GHz), Pentium

Chapter 2:
